Over 100 Years of Innovation

The Measurable Difference

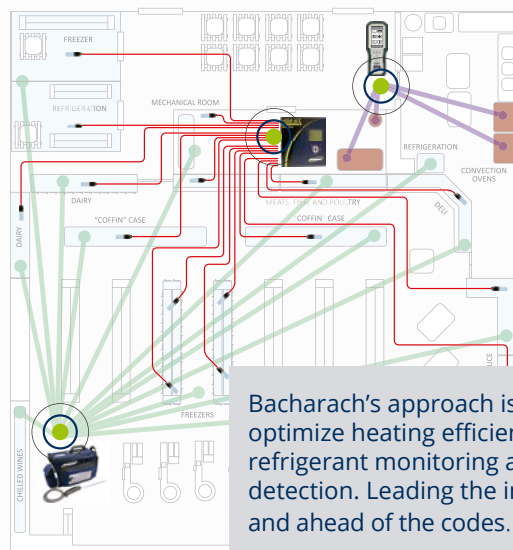

Through over 100 years of innovation, Bacharach is proud to provide our customers with products that offer discernible, differentiated value. Bacharach serves the HVAC and refrigeration industries by designing, manufacturing and supporting fixed and portable gas detection and monitoring instrumentation.

Expert knowledge to offer our customers effective solutions.

Bacharach products enable customers to increase their productivity and enhance efficiency while protecting lives and the environment.

Headquartered in the USA, Bacharach is a global leader, employing professionals worldwide with manufacturing facilities located in New Kensington, PA and Dublin, Ireland.

With comprehensive representation around the globe, and dedicated offices in New Kensington, Dublin and Toronto, Canada, Bacharach leverages its experience, history and expert knowledge to offer customers effective solutions.

Bacharach's approach is to optimize heating efficiency and refrigerant monitoring and leak detection. Leading the industry and ahead of the codes.

Heating, Ventilation, Air Conditioning and Refrigeration

Our Focus Markets

From flue gas and emissions analysis for combustion efficiency, to refrigerant leak detection and monitoring, Bacharach develops innovative products through intimate knowledge of customer needs.

Bacharach remains the company professionals turn to for quality products and market expertise.

Bacharach's instruments are engineered with advanced sensing technology making them simple to use and implement into a variety of applications, including:

- heating
- air conditioning
- chiller plants
- food and beverage processing
- supermarkets and food retail
- conditioned occupied spaces
- refrigerated storage
- white goods manufacturing
- commercial and industrial plants
- boilers and generators
- industrial appliances
- power generation engines
- commercial refrigeration
- data rooms

A few words about Our Products

Combustion and Emission Analysis

Bacharach stays connected to the changing needs of its customers by providing timely and relevant new products. In combustion gas analysis, Bacharach uses innovative Tune-Rite technology that allows technicians to save money by making intuitive troubleshooting suggestions for more thorough, efficient service calls. User friendly, free apps that generate "as-found" and "as-left" reports to enhance customer satisfaction and support reporting and performance history tracking. Bacharach allows accurate measurements for long life performance and low cost of ownership, as well as a pre-calibrated sensor program, providing a measurable difference while protecting lives and the environment.

Refrigerant Gas Monitoring & Leak Detection

Bacharach continues to exceed customer expectations, as well as industry standards, in product innovation, quality, value and delivery. Offering fixed and portable products for refrigerant monitoring and leak detection, point detectors and sampling systems, Bacharach products offer superior performance, flexibility and functionality. Able to detect very low levels for continuous monitoring of a variety of gases, Bacharach instruments integrate data into refrigerant management systems or operate stand alone systems. They feature the ability to activate alarms providing fail-safe alert for rapid response in the most varied and temperature extreme environments.
